Environmental Culture: The Ecological Crisis of Reason is a frontal attack on the irrational assumptions that drive Western society's progress toward ecological catastrophe. Val Plumwood maintains that "the dominant forms of reason--economic, political, scientific, and ethical/prudential--are failing us because they are subject to a systematic pattern of distortions and illusions," distortions that are blind to ecological value.

As the popular author Wendell Berry has stated it, our ecological crisis is a crisis of character, not a political or social crisis.¹⁷ Enlightened self-interest alone is not sufficient motivation for fallen human beings to deny gratification and sacrifice desires. The religion of consumerism is a spiritual problem, and we must fight fire with fire.

Readers of Val Plumwood ' s Feminism
and the Mastery of Nature (Routledge

1993) will find that the bulk of

Environmental Culture consists of a more
nuanced and thorough presentation of the

critical arguments found in that earlier

work. Plumwood ' s basic position is that
the ecological crises we currently face are

the result of arrogant cultures (based in
arrogant philosophical views) that deny the
