Eve Online Manual Piloting

Manual piloting is the act of maneuvering a ship without using commands relative to another object, like orbit, keep at range, approach, etc. It is achieved by double left clicking on empty space. Your ship will then orient itself and move in that direction. Your perspective, and thus where you're clicking is affected by the position of your camera, so if you require precision, zoom out as far ...

NEW PILOT FAQ - web.ccpgamescdn.com

Note that using MWD will increase your orbiting radius (due to high speed) and makes it easier for the target to make you overshoot and let him get away (especially if he's manual piloting). Bottom line, orbiting the target at close range, turn off MWD and turn on AB.
