The PowerBox Evolution is a modern power supply system containing all the electronic components required to power modern receivers, servos and models. Every single element, ICs, micro-controller and electronic circuit which is essential to a reliable power supply is duplicated!

PowerBox Cockpit
Could you check a Spektrum Evolution at your end starting it after it has been at a low temperature (8°C or less) for a couple of hours to see if this is perhaps normal. ... As you think it is a definite fault I had better send it to you so I will post it tomorrow to the PowerBox-Systems GmbH Ludwig-Auer-Strasse 86609 Donauwoerth Germany ...

A Visit to a Linkwitz Open House | PS Audio
I should clarify that there is a little confusion as to what, exactly, is meant by "direct drive". As a mechanical engineer by training, the term to me means a drive system in which there is a direct coupling between the motive force (motor, powered flywheel, and so on) and the final output, without an elastomeric element like a belt or idler.

Evolution Powerbox Systems
The PowerBox Evolution is always the first choice when a small, robust battery backer system is required: the typical range of applications extends from warbirds to 3D aerobatic models and even to jets. The first series of the Evolution was introduced back in the year 2004, and since that time it has been continuously developed and improved.
