What are Whole Numbers? - Definition & Examples - Video ...
On the Problem sheet in the sample file, there is a table named tblProducts, with 3 columns -- Product, Code and Category. Product. The first column has an 8-digit product ID number that is manually entered in the list. The first 3 digits of each number show the category code. For example, in the first product ID -- 12376543-- the category code is 123.

Algebra - Complex Numbers (Practice Problems)

For example, If we have a sequence of numbers: x, y, z, x, y, z, \dots that repeats after the third term. If we want to find out what is the fifth term then we get the remainder of $5 \div 3$, which is 2. The fifth term is then the same as the second term, which is y . Example: The first term in a sequence of number is 2.
