A third activity exploring this law has been added to the Student Exploration Sheet. In the Digestive System Gizmo, we altered how nutrients are absorbed in the intestines when no capillaries or lymphatic vessels are present. In the original model, nutrients would disappear from the food when no vessels were attached, but would not be absorbed.

Digestive System Gizmo : ExploreLearning
Find out by designing your own digestive system with the Digestive System Gizmo. Digestion is a complex process, involving a wide variety of organs and chemicals that work together to break down food, absorb

One of my favorite new Gizmos is the fairly new Measuring Volume one! Kids can use the sink for hours and never leave a impact on the environment! There's an exploration and a practice setting - the practice one guides the student on using the meniscus to determine accurate volume measurements - yay, what a time saver!

opportunity to apply engineering principles to a human organ system. In this Gizmo, students can assemble models of the digestive system from organs like the mouth, stomach, and colon. Models can be enhanced by adding accessory organs such as the pancreas which aid in chemical digestion. Students can then pass food through their system and evaluate its effectiveness in absorbing nutrients.
