The F4R is a new engine, to get to 200bhp wont cost a great deal but to go over that will. Also the problem parts are s expensive as Fred will tell you im sure is there isnt the demand and competition. If say theres was about 50 different tuners all offering different parts etc then that would drive the costs down on the parts.

As for power yeah unfortunately the standard F4RT engine can only take 300ft lb torque any more and they tend to throw or bend rods. The turbo is running pretty low and it's bigger than needed but the idea behind it was to have it working less so less heat was made which anyone with a meglio knows is the 'Achilles heal' of the conversion, heat.
