The next engine was a 12 valve over head cam 660cc water cooled engine called the F6A. The F6A was introduced into the Suzuki Carry Mini truck and Van also know as the Every in 1990 with a fan blade fixed to the water pump. This did not go well to the design of the water pump was changed and the radiator was moved forward so the engine would cool better and an electric cooling fan was used at the radiator.
