Hydraulic machines use liquid fluid power to perform work. Heavy construction vehicles are a common example. In this type of machine, hydraulic fluid is pumped to various hydraulic motors and hydraulic cylinders throughout the machine and becomes pressurized according to the resistance present. The fluid is controlled directly or automatically by control valves and distributed through hoses ...

Motor Controllers and Drives are electrical or electronic devices that regulate motor speed, torque, and position outputs. The drive modifies the power input to the motor to achieve the desired output. The controller circuits are commonly integrated with the drive circuits as one stand-alone unit, thus the terms motor drive and motor controller are frequently used interchangeably.

In 1898, Latil, in France, devised a front-wheel-drive system for motorising horse-drawn carts. In 1899 the inventor Henry Sutton designed and built one of Australia's first cars, called The Sutton Autocar. This car may have been the first front wheel drive car in the world. Henry's car was reported in the English press at the time and featured in the English magazine Autocar which the car was ...

A fan is a powered machine used to create a flow of air. A fan consists of a rotating arrangement of vanes or blades, generally made of wood, plastic, or metal, which act on the air. The rotating assembly of blades and hub is known as an impeller, rotor, or runner. Usually, it is contained within some form of housing, or case. This may direct the airflow, or increase safety by preventing objects ...

Netflix promised a big comeback in the third quarter, predicting more than 1 million new customers. While the far-left streamer outperformed that measure by two-fold, sending its stock skyrocketing in after-hours trading Tuesday, a closer look at the numbers shows that the vast majority of new Netflix subscribers are coming from overseas, with U.S. customers failing to return in significant ...
