Autolt – Wikipedia, wolna encyklopedia

A FAQ is a list of frequently asked questions (FAQs) and answers on a particular topic (also known as Questions and Answers [Q&A] or Frequently Answered Questions). The format is often used in articles, websites, email lists, and online forums where common questions tend to recur, for example through posts or queries by new users related to common knowledge gaps.

Autolt – Wikipedia

AutoHotkey is a free, open-source custom scripting language for Microsoft Windows, initially aimed at providing easy keyboard shortcuts or hotkeys, fast macro-creation and software automation that allows users of most levels of computer skill to automate repetitive tasks in any Windows application. User interfaces can easily be extended or modified by AutoHotkey (for example, overriding the ...

Autolt – Wikipedie

Autolt is a freeware Microsoft Windows automation language. It was most commonly used to create automation scripts (sometimes called macros) for Microsoft Windows programs. Like other automation programs, Autolt is best used for highly repetitive activities, such as rolling out a large number of PCs with identical installation instructions. However, with the new releases it has become an ...
