### Female Reproductive System: Organs, Function, and More

The female reproductive system is active before, during and after fertilization as well. It consists of the following parts: A pair of ovaries: Ovaries produce and store ovum in them. They also produce a female hormone called estrogen. Fallopian tubes (Oviducts): They are the site of fertilization. They connect ovaries with the uterus.

### Grades 9 to 12: Human Body Series - KidsHealth in the ...

The female reproductive system is made up of the internal and external sex organs that function in reproduction of new offspring. In humans, the female reproductive system is immature at birth and develops to maturity at puberty to be able to produce gametes, and to carry a foetus to full term. The internal sex organs are the uterus, Fallopian tubes, and ovaries.
