Fiasco (Polish: Fiaszko) is a science fiction novel by Polish author Stanisław Lem, first published in a German translation in 1986. The book, published in Poland the following year, is a further elaboration of Lem's skepticism: in Lem's opinion, the difficulty in communication with alien civilizations is cultural disparity rather than spatial distance.

Lem was born in 1921 in Lwów, interwar Poland (now Lviv, Ukraine) to a family of Jewish origin.According to his own account, he was actually born on the 13th of September, but the date was changed to the 12th on his birth certificate because of superstition. He was the son of Sabina née Woller (1892–1979) and Samuel Lem (1879–1954), a wealthy laryngologist and former physician in the ...

Lem ingeniously equipped his Astronauts with adequate technology, but it did not help them realize the everlasting dream of humanity of exchanging experiences with brothers in reason. Hence strangeness remains - as always with Lem – inscrutable, and people remain wrapped for eternity in their mythologies.

Fiasco Summary. Stanislaw Lem. Summary. If Lem's novel Solaris is preoccupied with the possibility of communicating with an alien species, then Fiasco is almost the polar opposite in that it shows how it may not be possible to communicate with alien life at all—especially if the aliens do not want contact.

Lem must be brilliant but Fiasco seems to be mostly comprised of long expositions on these subjects and the story itself moves very slowly. And I really couldn't understand the ending at all. It just sort of fell off the cliff.

Fiasco is the fourth and most pessimistic of Lem's "contact" novels (after Eden, The Invincible and Solaris). Humanity undertakes its first interstellar voyage in the hope of making contact with the inhabitants of the planet Quinta, but the aliens won't play ball and all the scientists can do, as usual, is present various theories which achieve little, nothing, or worse than nothing.

Pure "hard" sf of the finest: developing and embellishing some of the ideas put forth in One Human Minute (1986), Leto presents a disturbing, highly intelligent, and scathing account of medium-future humanity's attempt to contact an extraterrestrial civilization. When unmistakable signs of technological civilization are detected on a planet hidden inside the Coalsack nebula, an expedition ...
