NBER Working Paper No. 13054 Issued in April 2007 NBER Program(s):International Trade and Investment Despite the fact that importing and exporting are extremely rare firms devote little attention to the role of firms when discussing international trade.

A simple model of firm heterogeneity, international trade ...

The literature on international trade and firm performance grows exponentially. This paper attempts to summarize what we learn from this literature to guide future empirical and theoretical work in this area. The focus is on the empirical part of the literature that consists of research from manufacturing or services industries to study the links between ...

International trade in services: Evidence for Portuguese firms

This paper presents a general equilibrium trade model in which homogeneous firms choose a technology from a set of competing technologies and choose employees from a set of workers of heterogeneous skill. In equilibrium, the interaction between the characteristics of companies and the availability of workers of heterogeneous skill gives rise to firm ...

International Trade, Risk, and the Role of Banks

Downloadable! This paper examines the detrimental consequences of financial market imperfections for international trade. I develop a heterogeneous-firm model with countries at different levels of financial development and sectors of varying financial vulnerability. Applying this model, the mechanisms through which credit constraints operate.

Firms In International Trade Econpapers

Banks play a critical role in international trade by providing trade finance products that reduce the risk of exporting. This paper employs two new data sets to shed light on the magnitude and structure of this business, which, as we show, is highly concentrated in a few large banks. Instruments, letters of ...

Firms in International Trade by Andrew B. Bernard, J ...

While traditional trade theory focused on the country, and the new trade theory of the 1980's adopted the industry as the unit for analysis, the newest theory emphasizes the role of firms and firm heterogeneity in international trade. We describe insights from this reformulation that illuminates it.

Firms in International Trade - Princeton University

Abstract. Standard models of international trade devote little attention to firms. Yet of the 5.5 million firms operating in the United States in 2000, just 4 percent engaged in exporting, and the top 10 percent of these exporting firms accounted for 96 percent of U.S. exports.
