Trane XE90 Furnaces: Details & Reviews
Problem: Trane XB LED blinks 5 times and blower won't stop running, but no heat. Any ideas what the solution is? I am thinking some kind of fan control board. I can shut off power to the whole unit, but when I power back on I get the same problem. Blower runs with no heat. The thermostat can be set to "heat" or "off" but the blower still runs.

Looking for Trane furnace repair and replacement parts?
If it is gone just contact a trane dealer near you and give them the info off the furnace ie: model number, serial number. What it's doing is going out due to flame sensor failure. Take some fine sandpaper or steel wool and clean the flame sensor it is located right next to the pilot. It should be a 3" metal rod with white porcelain around the ...

Trane Flame Sensors - Trane Replacement Flame Sensors ...

I just moved in and furnace ignites for about 15 seconds then goes out. I've researched everything I can. Even found the orange wire for the press. Switch had "fallen" off and thought it might have been the whole problem, but still the same thing. From what I found so far I believe it has to be the flame sensor needs cleaning or replacement, but not sure how to get at it or really even know ...

Trane xe 90 flame sensor or what - Ask Me Help Desk

The flame sensor is a metal rod with white or dingy yellow/brown porcelain surrounding the mounting end. The porcelain insulates the sensor against grounding itself on the metal furnace frame. Some sensors are straight; some have a 45-degree or 90-degree bend near the end. The sensor is mounted to the outside of the burner assembly.
