crankshaft was heat treated for strength and rigidity with three main bearings lined with copper-lead.

*Ford Industrial Engines & Power Units (E '134' & D '172 ...
On a Ford 172 or Ford 192 industrial engine the distributor drive rod performs a very important function. This Ford 172 distributor drive shaft is a hex sided shaft made of hardened steel, 3.93" long with chamfered ends. This drive rod connects the distributor with the oil pump. The Ford 172 or 192 engine's cam gear drives the distributor which then through this short shaft drives the oil pump.*
