Ford 351 Engine Weight

www.fomoco.com has an "Engine Specs Reference" in their "Info Resources" section that lists, among other things, a nominal weight for 60's and early 70's Ford engines. It agrees with 68 stang's post except that I think his second 351 Windsor number should say 351 Cleveland. This reference has lots of handy info for stock Ford engines from the muscle car era.

The 1972 351 four-barrel engine had all the same specs as 1971's 351 Cobra Jet, but it was no longer called a Cobra Jet, at least by Ford. (Mercury literature retains the CJ reference.)

Everything You Need to Know About Ford's 351 Cleveland ...

The Ford 351 Windsor was first introduced in 1969 and was quite a breakthrough in regards to the ways Ford produced its V8 engines. When Ford introduced the 302 to replace the 289 the engines were very similar and even used the same pistons.. The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps.

The Ford 335 engine family was a group of engines built by the Ford Motor Company between 1969 and 1982. The "335" designation reflected Ford management's decision to produce an engine of that size (335 cubic inches) with room for expansion during its development. This engine family began production in late 1969 with a 351 cu in (5.8 L) engine, commonly called the 351C.

Ford 335 engine - Wikipedia

Engine builders and hotrodders have no problems pulling gobs of horsepower out of these engines, and popular upgrades include cylinder heads, camshaft, headers, and intake manifold. 351 Cleveland. The 351C was built in Ford's Cleveland, Ohio factory, and is part of the Ford 335 engine family.

What's the Difference Between a Ford 351 Windsor ...

Engine weight: 289 = 454 lbs complete. 351W (383) = 513 lbs complete. My expectation was that the Windsor motor would add about 75 lbs to the car, but it looks like it will in reality will only add 60 lbs. 94 additional CID for a 60 lb penalty.
