"Formation Processes of the Archaeological Record synthesizes the most important principles of cultural and environmental formation processes. It is intended as both introduction and guide in method and theory, fieldwork and analysis.

Formation Processes of the Archaeological Record: Michael ...

Formation processes are the events that affect how sites of human activity came to be buried and what happened to them afterwards. Each site has evidence of use and abandonment. Once the site ceases to have human activity present, it becomes subject to a myriad of events that dictate its potential survival and future in the archaeological record.

Formation Processes of Maritime Archaeological Landscapes ...

Understanding Site Formation Posted in Core Skills Site formation is a basic building block of archaeology: it is by analysis of this sequence through excavation that permits interpretation, which should in turn lead to discussion and understanding.
