*Extrasolar planets - Scitizen  
Bruce Macintosh's research focusses on the study of  
extrasolar planets, in particular the study of such  
planets through direct imaging, and on using adaptive  
optics to shape the wavefronts of light for a variety of  
applications. Direct imaging of extrasolar planets  
involves blocking, suppressing, and subtracting the  
light of the bright parent star so that a planet  
hundreds of thousands of ...*
