Want to listen to books instead? LibriVox is home to thousands of free audiobooks, including classics and out-of-print books.

Stress (biology) - Wikipedia

The committees of correspondence were shadow governments organized by the Patriot leaders of the Thirteen Colonies on the eve of the American Revolution. They coordinated responses to England and shared their plans; by 1773 they had emerged as shadow governments, superseding the colonial legislature and royal officials.

Larger employers are predominant in the sector, with firms having 100 or more employees employing 87% of all employees (see Figure 3). The highest proportion of employees in these large firms work in banking (28%), telecommunications and broadcasting (16%) and road transportation (16%).

Function 11 Mcgraw Hill Ryerson

Stress, either physiological or biological, is an organism's response to a stressor such as an environmental condition. Stress is the body's method of reacting to a condition such as a threat, challenge or physical and psychological barrier. Stimuli that alter an organism's environment are responded to by multiple systems in the body. In humans and most mammals, the autonomic nervous system ...
