**§ 340f HGB Vorsorge für allgemeine Bankrisiken - dejure.org**

**Until now, given a function  $f(x)$ , you would plug a number or another variable in for  $x$ . You could even get fancy and plug in an entire expression for  $x$ . For example, given  $f(x) = 2x + 3$ , you could find  $f(y^2 - 1)$  by plugging  $y^2 - 1$  in for  $x$  to get  $f(y^2 - 1) = 2(y^2 - 1) + 3 = 2y^2 - 2 + 3 = 2y^2 + 1$ . In function composition, you're plugging entire functions in for the  $x$ .**
