The need to change the automatic transmission fluid in your vehicle at intervals is often overlooked, especially in regions like the UK where automatic transmissions are far less prevalent than, say, the US. Most people are aware that their engine oil needs changing on a regular basis. When it comes ...

How often should we change gear oil? - Team-BHP

Transmission Oil Filters Transmission oil filters are required for all 2050 lb-ft and 2250 lb-ft rated transmission models, and for all Procision™ models. Transmission filters should be changed during regular transmission lube change intervals. Inspect the transmission filter for damage or corrosion during all preventative maintenance checks.

Service 101: Manual Transmission Fluid (Lube) Change ...

the oil in the gear box doesnt break down like it does in a 4st motor from burned carbon and the extra heat. Gear oil lasts a long time as long as it doesnt get water in it. The gray oil from alim plates doesnt hurt it either. Its not wrong to change it every ride or two, but its way more than it needs to be done if using a good synth oil.

How Often Do You Need to Change Your Automatic ...

Note: Ford recommend that the engine oil and filter are changed every 12 500 miles or 12 months. However, oil and filter changes are good for the engine, and we recommend that the oil and filter are renewed more frequently, especially if the car is used on a lot of short journeys. Every 12,500 miles or 12 months, whichever comes first
