Geometry Name: Proof Worksheet (3) Date

My "in-between" proofs for transitioning include multiple given equations (like "Given that $g = 2h$, $g + h = k$, and $k = m$, Prove that $m = 3h$.") This way, the students can get accustomed to using those tricky combinations of previous lines BEFORE any geometry diagrams are introduced. They are eased into the first Geometry proofs more smoothly.

Circles are a unique species of geometric shape, and the geometry worksheets in this section introduce the basic equations for calculating area and circumference of a circle. Problems that explore the relationships between the diameter and the radius are also provided, giving plenty of opportunity to explore the relationships between these values and pi and the area and circumference of a circle.
