The molten magma from volcanic eruption crystallizes to rocks with the passage of time; these rocks brake down to the soil due to the environmental effect like weathering, and this soil is again converted to the rock such as sedimentary rocks. Hence, the formation of rocks from the soil and soil to rocks takes place regularly.

Coduto, Geotechnical Engineering: Principles and Practices ...
Geotechnical engineering is the branch of civil engineering concerned

with the engineering behavior of earth materials. Geotechnical engineering is important in civil engineering, but also has applications in military, mining, petroleum and other engineering disciplines that are concerned with construction occurring on the surface or within the ground.
