Artifex is announcing end of life for GSView 6.0. Support will no longer be available. From time to time, Artifex may find it necessary to discontinue products for a number of reasons, including technology innovations, changes in market demand for the product, or obsolescence of the product.

Introduction to Ghostscript - Grenade

Ghostscript is actually two programs: a language interpreter, and a graphics library. The library provides, in the form of C procedures, all the graphics functions of the language, that is, approximately those facilities listed in section 8.1 of the PostScript Language Reference Manual, starting with the graphics state operators. In addition, the library provides some lower-level graphics facilities that offer higher

performance in exchange for less generality.

Ghostscript: Documentation - Ghostscript: Ghostscript

Invoking Ghostscript. This document describes how to use the command line Ghostscript client. Ghostscript is also used as a general engine inside other applications (for viewing files for example). Please refer to the documentation for those applications for using Ghostscript in other contexts.

Ghostscript User Manual - Yale University
The gs (gswin32c, gswin32, gsos2) command invokes Ghostscript, an interpreter of Adobe Systems' PostScript (tm) and Portable Document Format (PDF) languages. gs reads "files" in sequence and executes them as Ghostscript programs. After doing this, it reads further input from the standard input stream (normally the keyboard), interpreting each line separately.

Ghostscript Manual

This page holds archival documentation for previous releases of ghostscript, as well as the current development version. The documentation pages include some links to the Ghostscript source directories src and toolbin. These links will only work if you are viewing the Ghostscript documentation from the source distribution and not this website.
