The digestive system is a group of organs that does three things: • First, the digestive system breaks food down into useful nutrients, a . process called digestion. • Next, the nutrients move into the bloodstream, a process called . absorption.

Gizmo digestive system Diagram | Quizlet

Produces digestive enzymes. Theses include amylase, which breaks down carbohydrates, trypsin, which breaks down proteins, and lipase, which breaks down fats. Also produces an alkaline solution that neutralizes acid. Moistens food, helping to break it up and lubricate it's passage through the digestive system.

Student Exploration: Digestive System

The Digestive System Gizmo provides a unique opportunity to apply engineering principles to a human organ system. In this Gizmo, students can assemble models of the digestive system from organs like the mouth, stomach, and colon. Models can be enhanced by adding accessory organs such as the pancreas which aid in chemical digestion. Students can then pass food through their system and evaluate its effectiveness in absorbing nutrients.
