LabVIEW seems to be the easy and straight-forward software to use NI USRPs. I don't know much about LabVIEW but I know a bit about programming in GNU radio. It seems extremely flexible and attractive, at least for a programmer. So my question is that am I going to face too much trouble to get the NI USRP to work with GNU radio? I read here and there about the FPGA image and firmware.

...

One of the great strengths of GNU Radio, though, is how easy it is to move from simulation to real-world operation. In this tutorial, we will build on what you have learned so far and create real-world transmitters and receivers. In this tutorial, we will take your previous QPSK design and turn it into an actual transmitter.

Getting Started with RFNoC Development - Ettus Knowledge Base

GNU Radio; LabVIEW™ MATLAB®/Simulink® ... and the UHD/API manual. The first part describes details of Ettus Research devices, motherboards and daughterboards, as well as aspects of using UHD. The second is meant for developers writing UHD-based applications, and includes descriptions of the API, sorted by namespaces, classes, and files ...
