The video begins by introducing Einstein ' s famous equation, E=mc2, which means " Energy equals mass times the speed of light squared. " The speed of light squared is a really big number, so Einstein determined that an enormous amount of energy could be unlocked from a very small amount of matter. And he was right.

God's Equation : Einstein, Relativity and the Expanding ...

Einstein ' s general theory of relativity formulates the field equations in terms of partial differential equations. But to find a solution to these equations, and therefore to deduce results which can be compared with observations, we must integrate these equations. Einstein ' s field equations are non-linear and finding exact solutions to these equations is a tedious and difficult procedure.
