This week, I've noticed that I don't have nearly as much heat as normal in my 09 Jetta Sportwagen TDI. I have a 45 minute commute to work, all highway, and usually have to turn the temp control down after about the first 5-10 minutes of driving, but this week, with the temp control turned all the way, my car never seems to get past lukewarm.

The air conditioning system complements the heating and ventilation system in your car. It includes a cooling system, heating, humidity controller and blower unit and works just like the heat pump in a refrigerator. In simple terms, the air is directed through an evaporator, where it loses its heat to the refrigerant.
