Instead of an Intro to New Material section, I facilitate a few guided practice problems. The questions I use most often while guiding students are: "what do we start with," "then what happens," and "what's our unknown?" I want students to really make sense of the problems, and to understand what's happening in each.

guided practice problem 2 page 324 answers - Bing

The problems in this lesson require students to use decimals and fractions in their work, which is difficult for some of my students. The Guided Practice section of this lesson includes problems that I model with double number lines and ratio tables. For problem A, I model the solution using fractions. With problem B, I use decimals.
