Harley Davidson: Twin Cam 96ci Engine Specs

The Twin Cam gets its name from the fact that it has two cams in the crankcase to activate the valves. At 88 cubic inches (1,450 cc) of displacement, it is the largest production Harley motorcycle engine, and it produces 80 horsepower. The engine remains air-cooled, and uses overhead valves activated by pushrods.

torque specs for cam change | V-Twin Forum

*Note: Although several cam grinds were used in stock engines from 1999-'06, the timing specs of the 475G cams is most similar to cams used in 1999-'03 EFI engines. **551 cams are not recommended with compression ratio of 10:1 or*

CHOOSING A CAM. The question "What cam should I buy for my bike?" is the one we often hear. While there are no hard and fast rules for picking a cam for a specific application, some basic guidelines are worth considering. Keep in mind that performance camshafts are usually chosen for the basic purpose of producing more power from your engine.
