## Heart Dissection Walk Through - The Biology Corner

Using words, trace blood flow through the major blood vessels and heart, starting with deoxygenated blood returned from the body. The path would be to the superior vena cava then to the right atrium then to the right ventricle then goes to the right pulmonary artery, then comes back to the left atrium then to the left ventricle then to the left aorta then the left ventricle to the left aorta.

to force any blood clots out of the heart chambers. Pat the heart dry and place it in your dissection tray. 2.

Heart Dissection Lab - [graftonps.org](http://graftonps.org)  
Heart Dissection Walk Through. The heart dissection is probably one of the most difficult dissections you will do. Part of the reason it is so difficult to learn is that the heart is not perfectly symmetrical, but it is so close that it becomes difficult to discern which side you are looking at (dorsal, ventral, left or right).
