I have a high immunoglobulin IgM 826 (normal 60 - 263) . My sedimentation rate is 23 and my ANA is 1:80 speckled. Could this high IGM be a false positive for syphilis? All other tests came back normal. If not syphilis, then what are the other areas of research? I am taking Ovcon, Elavil for chronic pain, Procardia XL for Raynauds, Lodine for arthralgia, Hydrochlorithiazide for high BP as of ...

On follow-up w/ my PCP, additional testing showed that my enzymes and liver function remained normal, but that I had an elevated IgM antibody - value around 408. About 8 months ago when I was having similar problems, this value was also high, around 416. My PCP was going to consult with a hematologist, but I haven't heard anything yet.

RF IgM - Phadia

IGM-1100o (also referred to as the Outdoor IGM) addresses this use case. The IGM-1100o brings precise timing indoors and serves indoor small cells, but is located on the roof of the building instead of on a wall or ceiling. The Microchip IGM-1100o does not use Assisted-GNSS as it is placed outdoors, where GNSS signal reception is optimal.

Hyper IgM Syndromes | Immune Deficiency Foundation

The IATA Ground Operations Manual (IGOM) is your definitive source for the latest industry-wide standards harmonizing ground handling processes and procedures. It is ideal for frontline personnel! The IGOM and the Airport Handling Manual (AHM) are now stand-alone, interdependent products which are also available as combos. The IGOM is procedure driven, focusing on "how to do".

What is the reason for a high IgM levels?

This guide is an interpretation of the B.C. Employment Standards Act and Regulation to help provide a clear understanding of the law. It is not a legal document and should not be used as a substitute for legal counsel.
