A lawn mower (also known as mower, grass cutter or lawnmower) is a machine utilizing one or more revolving blades to cut a grass surface to an even height. The height of the cut grass may be fixed by the design of the mower, but generally is adjustable by the operator, typically by a single master lever, or by a lever or nut and bolt on each of the machine's wheels.

The bigger the lawn, the bigger your mower should be. Another thing to consider is the collection box size, the bigger the box the less stopping and emptying you will need to do. If you would like a classic stripe effect finish, a mower with a rear roller will help to flatten the grass after it has been cut.

Don't let its size fool you. Our Commercial 30 mower is deceptively light and easy to maneuver. In fact, it feels and handles much like its Commercial 21 counterparts. The major difference: its 30-inch cut delivers up to a 40% increase in cutting efficiency compared to a standard 21-inch mower-without wearing out the machine or its operator.
