The Chemistry of Paper - www.ChemistryIsLife.com

Chemistry is a practical subject that is at the heart of our technological way of life. Chemistry is the study of the matter that makes up our universe, the energy that powers it, and how these interact. From a slightly more down-to-earth perspective, everything from fireworks to cleaning products to paint is chemistry.

10 Chemistry Questions You Should Be Able to Answer

Chemistry's Role. In order to have paper, chemistry must be put to use. The main ways chemistry is used in creating paper is when the lignin is dissolved in the water and taken from the cellulose. The next way chemistry is used is when the fibrils from the cellulose bond together to form a compact structure called paper.
