You multiply the percent by .01 to change the percent to a decimal, then take the number (36) and divide it by the decimal you came up with. That gives you 48 in this case. 0 0 2

36 (number) - Wikipedia
It is the number of the Great Quaternary of the pythagoricians, obtained by the sum of the first four odd numbers, 1 + 3 + 5 + 7 = 16, and the first four even numbers, 2 + 4 + 6 + 8 = 20. Also: 36 = 13 + 23 + 33. The sum of numbers 1 to 36 gives 666, the number of the Beast in the Revelation.

How to Calculate 2/3 of a Number | Sciencing
Find the number that is equidistant of both numbers. In this case, 45, which is 6 away from both numbers. Square that number. $45^2 = 2025$; Square the distance the numbers are from the central number. $6^2 = 36$; Subtract that number from the first square. 2025 - 36 = 1989 If you have taken algebra, the formula is expressed as: 51 × 39 =

How To Do Number 36
There indeed is a formula/pattern. Count the number of diagonals coming out of each vertex, then multiply that by the number of vertices. Divide this result by 2 to get the total number of diagonals. Here, 5 diagonals x 8 vertices = 40. 40/2 = 20. Or if you're impatient like me, just draw them all in. ?

How to Do Long Division by One Number - dummies
Apply the divide by the top, and times by the bottom as you need the number in the question. 36 divided by 2 is 18, and 18 times 9 is 162.

How do you beat level 36 on 40x escape - Answers
The answer to the question is "A walk", because considering the fly just so happens to fly, and a fly without wings cannot fly, then an appropriate name for it is "walk", since the only thing it can do to move is to walk. The original question as it appears in the Beta. Trivia
