Since ARP head studs are the de facto standard for today's diesel engines, it only makes sense for ARP to be the official head stud of the National Hot Rod Diesel Association. NHRDA competitors are continually pushing the limits of power and torque that diesel engines can generate and they use ARP to keep the heads on.

Salt 101 - Bonneville Racing Guide - Hot Rod Magazine

Hot rods are typically American cars that might be old, classic, or modern and that have been rebuilt or modified with large engines optimised for speed and acceleration. One definition is: "a car that's been stripped down, souped up and made to go much faster." However, there is no definition of the term that is universally accepted and the term is attached to a wide range of vehicles.

Hot rod - Wikipedia

If you are not experienced on aircooled VW engines, you need to know this going in. You should consider the 69-74mm stroke engines as all in the same family, and 76-84mm as a different family. "Confusion" will always be in the 74-76mm range, because they sound close in size, but are totally different from a build standpoint.
