archive member, then '\$@' is the name of the archive file.

Make your headphones sound much better on Android with Wavelet

Make loves c compilation. And every time it expresses its love, things get confusing. Perhaps the most confusing part of Make is the magic/automatic rules that are made. Make calls these "implicit" rules. I don't personally agree with this design decision, and I don't recommend using them, but they're often used and are thus useful to know.

GNU make

I have successfully made an automatic calendar (for meeting purposes) using your tutorial, however when I try to add the meeting title into the row below dates in the correct date column it doesn't seem to change when the month changes it stay
