HTML and CSS: Design and Build Websites | Wiley

CSS stands for Cascading Style Sheets. Similar to HTML, CSS is a tool used for web design. In fact, HTML and CSS go hand in hand when it comes to designing a nice-looking website. The main difference between the two is that HTML is used mainly

for creating the content of the website, while CSS is used for styling that content.

HTML Responsive Web Design - w3schools.com

CSS, or Cascading Style Sheets, is a presentation language created to style the appearance of content—using, for example, fonts or colors. The two languages—HTML and CSS—are independent of one another and should remain that way. CSS should not be written inside of an HTML document and vice versa.
