Human Natures Genes Cultures And

From genes, to religion, to cultures, our complex human natures are unraveled and put before us to see and recognize as the wonder they are. Evolution of the human species is explained in the timeframe and the manner supported by the best scientific evidence of the day. Yet, the wonder and mystery of sentient beings is not in any way denigrated.

(PDF) Human Natures: Genes, Cultures, and the Human Prospect

The human prospect depends not only on the genes that shape our bodies, but also on the human natures that shape our cultures. Physicist Fred Bortz is the author of several children's Science books, including Collision Course! Cosmic Impacts and Life on Earth.

Human Natures: Genes, Cultures, and the Human Prospect ...

Rather, human nature is formed by culture and it is pluralized to reflect our great diversity. Ehrlich gives a nod to our biological being (food, sex, and some genetic-based diseases). He grants the power of the genotype but then states that it is transformed, most meaningfully, by culture.

Genes Affect Culture; Culture Affects Genes | Psychology Today

The unitary, unchanging behavioral "human nature," once thought invented by gods and later assumed to be a product of genetic evolution, is nonexistent. Our complex and flexible behavior is largely determined by our environments, and especially by the extragenetic information embodied in our cultures.
