Then I'll try to crank and crank and nothing.

Hello all; My engine manual requires a strait 40 weight for the temperature range that I live in. I burn no oil when using the strait 40. When I switched this winter to a 5w-40 synthetic for cold start ups to push snow with a blade. I noticed a significant burn. I don't have a number or oz. figure, the level just moved significantly down the dipstick when checking.
