WAP - 4 is a common electric locomotive used in India. The locomotive was developed after a previous class WAP 1 was found inadequate to haul the longer, heavier express trains that were becoming the mainstay of the Indian Railways network. It was introduced in 1994, with a similar bodyshell to the WAP-1 class, but with Hitachi traction motors. Electricals are traditional DC loco type tap changers, driving six traction motors arranged in Co-Co fashion. This locomotive has proved to be highly suc
