Emerging viral diseases of fish and shrimp

Aquaculture is rapidly growing part of agriculture worldwide. It makes up around 44 percent of total fish production globally. This increased growth of production is achieved despite facing many challenges in the aquaculture environment. Among production limiting challenges, the infectious disease takes the lion share by causing multibillion-dollar loss annually.

Bacterial Diseases in Aquaculture - Exotic and Laboratory ...

Apart from viral properties, several factors influence the prevention and control of viral diseases in aquatic organisms. Current aquaculture farming practices that depend on high-stocking densities to
