offenders' decision-making can be analysed in order to help make investigations more effective and efficient in areas such as behavioural offender profiling, geographic profiling, and policing, for example.

Looking guilty: Handcuffing suspects influences judgements of deception ... Offender profiling. Much of this work comes from applied psychologist David Canter, PhD, who founded the field of investigative psychology in the early 1990s and now runs the Centre for Investigative Psychology at the University of Liverpool. Investigative psychology, Canter says,

**Psychological
sleuths--Criminal profiling:
the reality behind the myth
Programs that teach
nonvalidated indicators
produce negative results in
people's ability to detect lies
from truths. 2 For example, a
common belief is that a lack
of eye contact is an indicator
of lying; however, numerous
studies have tested this and
most do not support it.
Therefore, this belief is more
myth than reality. 3 A recent
study showed that liars know
this too and compensate for**
