Internet of Things (IOT) with Raspberry Pi and Slack | Udemy

Raspberry Pi is a low cost, credit-card sized computer that plugs into a computer monitor or TV, and uses a standard keyboard and mouse. It is a capable little device that enables people of all ages to explore computing, and to learn how to program in languages like Scratch and Python. It's capable of doing everything you'd expect a desktop computer to do, from browsing the internet and ...

Bookmark File PDF lot Raspberry Pi Course Details B M Embedded

This is an Internet-of-Things course, not merely a Raspberry Pi course. This is important because we think too many courses end up becoming like manuals for the Raspberry Pi, or the Arduino, or some specific hardware device. This course is careful to generalize. The course takes you to a solid intermediate level.

From 0 to 1: Raspberry Pi and the Internet of Things | Udemy

Upon successful completion of this course the learner will be able to: Explore the opportunities for the IoT. Discuss the concept behind the IoT. Develop a UWP application. Explain what raspberry Pi 3 is. Identify the different parts of a raspberry Pi 3. Describe the functions of the raspberry Pi 3.
