IP addressing and subnetting fundamentals

UNDERSTANDING IP ADDRESSING 8 Subnetting In 1985, RFC 950 defined a standard procedure to support the subnet-ting, or division, of a single Class A, B, or C network number into smaller pieces. Subnetting was introduced to overcome some of the ...

Ip addressing and_subnetting_workbook (1) - SlideShare

When a host attempts to communicate with another device using TCP/IP, it performs a comparison process using the defined subnet mask and the destination IP address versus the subnet mask and its own IP address. The result of this comparison tells the computer whether the

destination is a local host or a remote host.

IP Addressing and Subnetting Workbook - Student Version 1 ...

Understand IP Addresses. An IP address is an address used in order to uniquely identify a device on an IP network. The address is made up of 32 binary bits, which can be divisible into a network portion and host portion with the help of a subnet mask. The 32 binary bits are broken into four octets (1 octet = 8 bits).

Ip Addressing And Subnetting Workbook

IP Addressing and Subnetting Workbook - Student Version 1_5.pdf

Understanding TCP/IP addressing and subnetting basics

IP Address: A logical numeric address that is assigned to every single computer, printer, switch, router or any other device that is part of a TCP/IP-based network; Subnet: A separate and identifiable portion of an organization's network, typically arranged on one floor, building or geographical location; Subnet Mask: A 32-bit number used to ...
