Protractor: Protractor is an instrument for measuring angles. It is semi-circular or circular in shapes and is made of flat celluloid sheet. The angles can be set or measured from both sides, aligning the reference line and point '0' with the corner point of the angle. Figure shows how to read or set the angle. Protractor can also be used to divide a circle or drawing sectors.

Exam Paper - mpdt.nic.in

Technical design has changed from drawing by hand to producing computer-aided design drawings, where drawings are no longer "drawn", but are built from a virtually-produced model. Drawings are not necessarily produced in hard copy at all, and if they are needed they are printed automatically by a computer program.

*For All ITI Trade's (Syllabus) Subject - Engineering and ...
Engineering drawing is a graphical language of an engineer to convey one's ideas most effectively, easily, conveniently and with high speed. So Engineering drawing is a starting point of all engineering branches such as Mechanical, Production, Civil, Electrical, Electronics, Computer science, Chemical etc.*
