"A synchronic study of language is a comparison of languages or dialects—various spoken differences of the same language—used within some defined spatial region and during the same period of time," wrote Colleen Elaine Donnelly in "Linguistics for Writers." "Determining the regions of the United States in which people currently say 'pop' rather than 'soda' and 'idea' rather than 'idear ...

Definition and Examples of Synchronic Linguistics - ThoughtCo

In linguistics, a synchronic analysis is one that views linguistic phenomena only at a given time, usually the present, but a synchronic analysis of a historical language form is also possible. It may be distinguished from diachronic, which regards a phenomenon in terms of developments through time.

Diachronic analysis is the main concern of historical linguistics.
