EON Series - Customer service

I've got a JBL EON 518S Sub that someone asked me to look at. The switching power supply appears to work well and the preamp signal led lights up when I apply a tone but that's as far as it gets. I haven't been able to score a schematic from JBL. At this point I'd like to isolate if the problem is in the preamp board or the power amp board so I can just order the appropriate board.
