Bayesian inference is a central concept, and we will study Markov chain Monte Carlo simulation methods from both applied and theoretical viewpoints. Jackknife and bootstrap methods will be studied, as well as decision theory. ... Jim Albert: Bayesian computation with R. ... Solutions to the exam will be published on this homepage after the exam.

Workshop Bayesian Thinking: Fundamentals, Computation, and ...

Bayesian Computation with R focuses primarily on providing the reader with a basic understanding of Bayesian thinking and the relevant analytic tools included in R. It does not explore either of those areas in detail, though it does hit the key points for both. As with many R books, the first chapter is devoted to an introduction of data manipulation and basic analyses in R.

Bayesian Computation With R

Bayesian Computation with R introduces Bayesian modeling by the use of computation using the R language. The early chapters present the basic tenets of Bayesian thinking by use of familiar one and two-parameter inferential problems. Bayesian computational methods such as Laplace's method, rejection sampling, and the SIR algorithm are ...
