Every engine is reverse engineered, allowing ATK to find and remove any factory original defect. This attention to detail and quality will save you time and money by keeping your Hyundai or Kia out of the shop and on the road. Engines are factory checked after assembly to ensure proper operation.

Kia Sportage Dohc Engine

Although there are three variations of the engine, the Kia Sportage only uses Theta II engines. Stainless steel overhead camshafts and shimless bucket tappets in the cylinder head identify it. The engine is also equipped with the trademark complete timing system that controls continuously variable valve timings.

Kia Sportage - Wikipedia

The rest of the world received the FE-DOHC in the 1995-2003 Kia Sportage, built by Kia under license. Kia first introduced the engine in March 1992, when they installed it in the Kia Concord, a license built version of the 1982 Mazda Capella. The Sportage variant was reconfigured for rear-wheel drive configuration with long single-runner intake manifold, low-duration cams and exclusively in the low compression ratio of 9.2:1.

Mazda FE-DOHC engine - Wikipedia

2002 Kia Sportage 2.0L dohc, is an interference engine, will cause piston to valve damage, Kia recommends timing belt replacement in California every 90,000 miles, except California every 60,000 miles, hope this was very helpful.
