Overview. With a network-centric configuration, knowledge workers are able to create and leverage information to increase competitive advantage through the collaboration of small and agile self-directed teams. For this, the organizational culture needs to change from one solely determined by a single form of organizing (e.g., hierarchy) to an adaptive hybrid enabling multiple forms of ...

Collaboration Networks 101 | Smartsheet

Knowledge can be tacit or explicit. Both tacit and explicit knowledge are used to create knowledge assets. Knowledge assets create value for the organization and continually evolve as the organization's practices change. For this reason, project managers must become and remain effective with their project management activities.

Network-centric organization - Wikipedia

A collaborative network is a network consisting of a variety of entities (e.g. organizations and people) that are largely autonomous, geographically distributed, and heterogeneous in terms of their operating environment, culture, social capital and goals, but that collaborate to better achieve common or compatible goals, and whose interactions are supported by computer networks.
